4.10 25/00047/PA - Taddington Valley, Walderslade

Work in Taddington Valley Public Open Space along the main path. Create a 200 metre long 'Woodland Ride' by coppicing trees under 150mm DBH either side of the main path within the area marked in green. Some single stemmed trees of this size also to be felled and left to regrow as coppice. This will form a key connection between grassland areas. It will open this area up making it more inviting the coppicing will be left stacked along the ride either side to rot down as this is another good habitat for attracting beneficial wildlife and fungi. Replant selective areas of the ride either side, at a low density with native trees and shrubs to increase diversity. The planting mix to include native Hawthorn, Dogwood, Dog rose Euonymus, Wild privet and Guelder rose. This will add another layer of complexity to

the woodland habitat which is lacking at present. Standing in Groups W3 and W5 of Tree Preservation Order
